POOL SIZE 500 cm.
EXCAVATION AND INFRASTRUCTURE
CONCRETE 650 cm.

Pouring 30 cm. of
stabilizer concrete
on the panel supports

20 cm. thick double row iron
reinforced concrete on the floor

EXCAVATION AND INFRASTRUCTURE CONCRETE 1150 cm.

1
Excavation appropriate to pool design

2
Excavation appropriate to pool design

3
Substructural concrete laying

4
Panel montage

5
Concrete laying to supports

6
Preparation and protection of machine room.

Panel pools gives you pool pleasure in every environment with their superior design and technological structure. Whether over ground, semi ground or completely built-in...

DEPTHS

CO POOL system does not have dimension or measurement limitation. Production can be done on demanded dimension, form and measures. Our prefabricated panel pool systems are based on the technology which provides construction of pools in demanded shape and dimensions in the most durable way and in the shortest time by decreasing costs to minimum.
